Fibre cement – The short version

What is fibre cement?

Cembrit fibre-reinforced cement is a hardwearing and durable construction material that is ideal for all kinds of exterior and interior protective surfaces. It is lightweight and easy to handle which makes it versatile and suitable for many facade applications and details.

Cembrit fibre cement products are resilient on exposure to freeze-thaw, snow, rain, heat, humidity and direct sunlight.

Fibre cement features a high pH value which makes it resistant to algae and bacteria and the growth of moss, fungi etc. – even in more demanding sub-tropical climates.

Cembrit fibre cement can absorb and release moisture for unlimited cycles without affecting the product's durability or need for maintenance.

Why choose Cembrit fibre cement products?

Besides being resistant towards rot and fungal growth, Cembrit fibre cement products require only a minimum of maintenance. Adding to this, all Cembrit fibre cement products are non-combustible which means that they have a better fire resistance than timber or plastic based alternatives.

With more than 90 years experience in the manufacture of fibre cement, Cembrit offers tried and tested solutions for various building applications. We strive to deliver the best possible solution for you, your family and your home. We want to make your life easier and better. At Cembrit we truly are Building Better Days.

Looking for the natural look and feel of wood?

15 year warranty

Natural look with limited maintenance

Complete range of finishing trims

Cembrit Plank & Cembrit Panel

Cembrit fibre cement plank and panel are building products designed with a windproof membrane to withstand temperature and weather fluctuations even in extreme climates. Cembrit Plank and Cembrit Panel are made of materials which consist of non-toxic, inorganic raw materials. This means that they remain unaffected by the presence of moisture during and after installation.

Quality

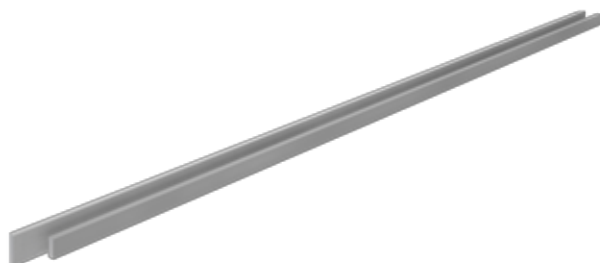

All products are manufactured to meet or exceed the specifications outlined in the EN 12467:2012+A1:2016 fibre cement flat sheets, Category A2.

Cembrit Plank

Ideal for replacing high maintenance wood and can be used as weatherboard, soffit, gable, dormer window, fascia board, hanging eaves, garage or as a balcony skirting. To name but a few...

Cembrit FC Trim Reversible

Cembrit fibre cement trim comes as double-sided trim. The trim has a smooth side and a wood grain side - leaving it up to you to decide which aesthetic feature you are looking for.

Paints

Cembrit Plank and Cembrit Panel are ready primed or ready finished. An automated painting process seals each piece for maximum resistance to exterior exposure which is backed by a Cembrit 15-year warranty.

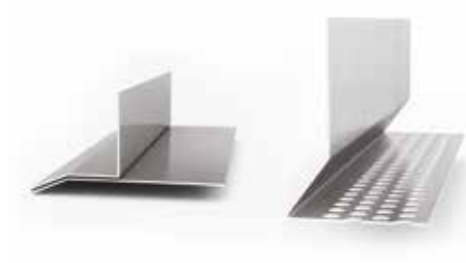

We offer a broad spectrum of design possibilities, and special colours are available upon request.

Cembrit Panel

Suitable for hard-to-reach places and as replacement for plywood sheeting used in areas frequently exposed to rain and humidity like fascia boards and on dormer windows.

Cembrit Alu Profiles

Cembrit Alu Profiles are developed for an unobtrusive appearance around doors, windows, corners and other trim work. They come in different colours to complement your choice of facade appearance.

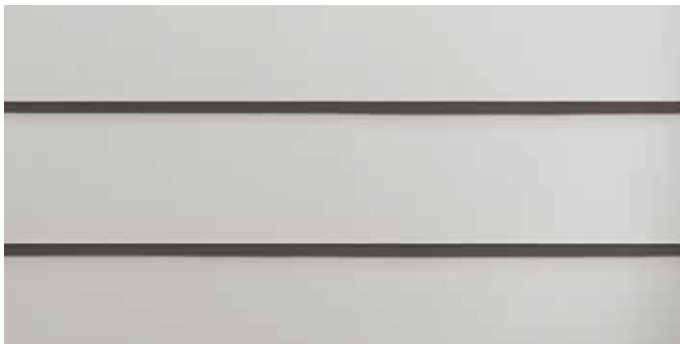

Cembrit Plank

Cembrit is one of the leading European manufacturers of multi-capability fibre-cement building products. Our products and solutions add exciting new design opportunities for moulding attractive, durable settings for people's lives. But Cembrit is more than mere products. We also help make all kinds of design and construction projects easier - as well as more profitable, inspiring and effective.

And for us, all construction also involves building relations with people, making your day better, and helping you make the day better for others. Making it a day to remember.
